

Phantom™ Big Bore Bridge Plug

Phantom™ plug is a revolutionary big bore plug designed for plug & perf operations or applications where multiple plugs are required to be set in a single wellbore. The innovative ball seat type plug used in conjunction with the VVANISH™ metal dissolvable ball totally eliminates the need to drill out the plug thus significantly simplifying the overall operation and minimizing the cycle time from stimulation to placing the well on production.

Features:

- Maximum 3" ID big bore allows maximum production through tool and CT intervention through tool thus eliminating the need for drill out.
- Pressure rating to 10,000psi.
- Temperature rating to 302 °F.
- Zero downhole trash when used with VVANISH™ metal dissolvable frac balls.
- Retrievable design allows achieving full casing ID if necessary.
- Compatible with standard wireline or hydraulic setting tools.
- Robust design minimizes premature setting risk.
- Special design on bottom eliminates possibility of ball from lower zone inhibiting flow back.

Specifications

Model	Casing		ID (in)	OD (in)	Pressure Rating (psi)	Ball Size (in)
	Size (in)	Weight (ppf)				
4.5 Phantom™	4.5	13.5	2.480	3.622	10,000	2.835
5.5 Phantom™	5.5	17.0	2.717	4.291	10,000	3.250
		26.0 – 26.8	2.750	4.063	10,000	3.250
			2.750	3.929	10,000	3.250
5.5 PhantomX™	5.5	26.8	1.969	3.661	10,000	2.480
