

## VERTECHS WIZARD® Fully Dissolvable Frac Seat

VERTECHS WIZARD® patent pending fully dissolvable frac seat is the most compact dissolvable frac plug in the market. It is an optimal solution designed for quicker dissolution and better pumping down ability, which also leaves no debris downhole. It saves operational time and expense, reduce related risk of casing damage from milling and brings the well into production more quickly. VERTECHS WIZARD® FS can be set by conventional wireline or hydraulic setting tools. For complete application flexibility, the rate of dissolution (ROD) can be customized on a case by case basis and designed based on the operational requirements.

### Features

- Fully dissolvable
- Better pump down ability with compacted design
- Pressure rating up to 10,000psi
- Suitable for low temperature application at 104°F (40°C), high temperature up to 302°F (150°C)
- Customizable ROD (Rate of Dissolution)
- Compatible with VVANISH™ dissolvable frac ball
- Running with Baker#20/10 standard wireline or hydraulic setting tools
- Robust anti-preset design minimizes premature setting

### Specifications

| Casing Size                                | Weight (lb/ft)     | Casing Grade        |
|--|--------------------|---------------------|
| 4.5"                                       | 11.6-15.1          | N80<br>P110<br>Q125 |
| 5"   | 23.2-24.1          |                     |
| 5.5"                                       | 17, 20-23, 26-26.8 |                     |
| 6"   | 24.5               |                     |
| *Customized designs available upon request |                    |                     |
