

## WIZARD THRU-TUBING Dissolvable Plug

WIZARD THRU-TUBING Dissolvable Plug is capable of passing thru 3.5” tubing, expand up to 90% from its original OD to set inside 4.5”-5.5” casings, without the need of additional equipment for deployment. WIZARD® THRU-TUBING dissolvable plug is specialized to perform tasks that even high expansion frac plugs could not, due to extreme down hole restrictions or thru-tubing isolation applications. In some extreme cases where geological activities have caused casing collapse, some completions were forced to be abandoned or to put on halt, because there are no tools currently available to continue well completion beyond the restriction point. With fully dissolvable feature, it also minimizes post completion intervention risks, further reducing completion costs and time under such challenging scenarios.

### FEATURES:

- 7,000 psi
- 140-330°F
- Customized hydraulic setting tool (included)
- Full metal seal, No elastomer components
- Fully dissolvable
- Run with coiled tubing

### SPECIFICATIONS:

Casing Size	Casing Weight (lb/ft)	Casing Grade
4.5"	9.5-12.6	N80
5"	13-24.2	P110 Q125
5.5"	26.8	140V
