

FALCON Ultralight Fast-Drill Frac Seat

FALCON Ultralight Fast-drill Frac Seat combines simple, robust design, superior performance and fast drill-out ability. It is one of the lightest and most compact frac plugs in the market, compatible with conventional wireline or hydraulic setting tools. With a lighter, shorter body and fewer parts, Falcon Ultralight Fast-Drill Frac Seats has an average milling time of 5-10 mins. Upon milling, the light weighted, fine cuttings can be circulated out of the well much more quickly and easily with lower pump rate. With premium seal material, pressure rating of Falcon Ultralight Fast-Drill Frac Seat is rated up to 10,000 psi.

Features

The Lightest And Most Compacted Design In The Industry

- Ultralight and compact design
- Light, fine cuttings, easily circulated
- ZERO cast iron parts
- Pressure rating up to 10,000 psi (STD)
- Temperature rating up to 302°F (STD)
- Used with VVANISH metal/PGA dissolvable frac ball
- Compatible with standard wireline or hydraulic setting tools
- Robust anti-preset design

Specifications

Casing Size	Weight (lb/ft)	Casing Grade
4.5"	11.6-15.1	N80
5"	23.2-24.1	P110
5.5"	17-26.8	Q125
