

Case Study-VERTECHS eHPIT® - Electronic High-Pressure Invasion Tester

No more guess work, understanding your mud invasion or viability of LCM anywhere anytime.

eHPIT® is the upgrade of HPIT, eHPIT® is utilized worldwide to support drilling fluids experiment related to the optimization/comparison of,

- Drilling fluids invasion control performance
- Lost circulation material evaluation
- Wellbore strengthening material evaluation

Applications of (e)HPIT®

8 years case history.

7 countries and districts.

18 major operators and drilling companies.

100+ challenging wells.
